Problem Statement

Turing Machine

Introduce the problem you are trying to solve, motivate why solving this problem is important, highlight the significance of solving this problem. (What are you trying to do and why?)

Proposed solution

How do you plan to solve this problem? Will you require any hardware to do so (e.g., Raspberry Pies)? Will you require any third-party software or libraries?

Preliminary Time Plan

Theorem

Provide a preliminary time plan (e.g., Gantt chart in a readable form) and division of work among group members.

Items and Numbers

- > one
- > two
- > three

1. first
2. second
3. third
